## Manufacturers' Sample Furniture Sale

BEDROOM SUITES.

 CHIFFONNIERS, SIDEBOARDS,  
OLD DRESSERS, TABLES, ETC.

A part of this large stock will be on sale; as space permits, in the new Wood County National Bank Building, Grand Rapids, Wisconsin.

### Sale Opens Sat. Morning, June 9th.

This stock consists entirely of new goods, having been used as samples in furniture exhibit, and as these patterns are usually discontinued at the end of every season, we were enabled to buy them at a figure so that they can be sold at the manufacturers' prices, and as these opportunities do not occur very often, it will pay you to examine these goods if you contemplate purchasing.

Our prices are low and our terms cash. We will make free delivery to any railroad station in Wood county. Remember the date, Saturday June 9th, 1906.

Manufacturers' Sample Furniture Company.  
J. R. RAGAN, Mgr.

### Federation of Womens Clubs.

In view of the fact that last week all clubmen were rushing to St. Paul to attend the biennial meeting of the General Federation of Womens Clubs, it seems not inapt to submit to the citizens of Grand Rapids an outline of the plan of work adopted by the Womens' Federation of clubs, recently organized in our city. Though the outline is crude, as yet, it is still a matter in which every man, woman and child should be interested.

It is work that has been taken up universally in the larger cities, and many small cities and hamlets have caught the infection and are doing all they can in the way of cleaning, improving and beautifying the alleys, ways, streets and public parks, in an endeavor to make the waste places blossom like the rose.

As is already known our club women confederated about two months ago. The object of the federation is, "To promote unity among its members; to create an organized center of thought, and action; to encourage social, educational, literary and artistic growth; and whatever relates to the best interests of the city."

The organization being now perfected they will hold their first regular meeting at the residence of Mrs. O. T. Hougen, June 14th, 1906, at three o'clock p. m.

The club work, as outlined by the executive board, is divided into four heads, and the following committees have been appointed.

City improvement—Mrs. Mackinac, chairman; Mrs. Hougou, Mrs. Jackson, Mrs. Hill, Mrs. Fontaine. Committee on schools—Mrs. W. F. Kellogg, chairman; Mrs. Rockwell, Mrs. Natwick, Mrs. Boorman, Mrs. Looze.

Library committee—Mrs. Youker, chairman; Mrs. Brundage, Mrs. Raymond, Mrs. Geo. Mead, Miss Halblum. Committee on art—Mrs. Pease, chairman; Mrs. B. L. Brown, Mrs. L. E. Phillos.

There is a committee on ways and means with Mrs. Goggin as chairman; Mrs. John E. Daly, Mrs. Drumb, Mrs. McGinnis, Mrs. Hambrecht. It is the intention of the Federation to hold four meetings during the year, the programs bearing upon the topics in the order above mentioned. The subject under consideration for the meeting of June 14th, will be "The City Beautiful," and there will be a short address by Mayor Wheeler.

Several musical numbers will be given, and refreshments will be served by the Travel Class. In this work which should appeal to everyone who has the interest of the city at heart, the co-operation of all our citizens is earnestly desired. It is to be hoped the men of Grand Rapids will rally to the support of the Federation, "Wake up the white woman's burden," and help the good work along.

### Death of Mrs. Gill.

Mrs. P. S. Gill died at her home in this city on Monday morning after an illness extending over a short time, cause of death being blood poisoning. The death of Mrs. Gill was a great surprise and shock to the people of our city, as she was about town and enjoying good health up to the time she was taken sick. She is survived by a husband and four children who have the sympathy of the community in their sad affliction. The funeral occurred on Thursday, there being services at the house and also at the Congregational church. Mrs. Gill was a member of the Eastern Star and the Lady Macabees, and these societies will hold service over the remains also.

### A Double Wedding.

A double wedding occurred at Rudolph on Tuesday evening, Rev. Van Sever of the Catholic church officiating. The contracting parties were Emmet Slatery and Kathryn Fogarty of the town of Carson. The other couple were Will Fogarty of Carson and Miss Anna Gross of Stevens Point. All of the young people are well and favorably known in and about Rudolph, where they have many friends to wish them a happy journey thru life.

### Leverance-Ottman.

Fred Leverance and Miss Nettie Ottman of Port Edwards were married on Monday afternoon at three o'clock at the Lutheran church on the east side. They were attended by J. P. White, H. Leverance, Kathryn Ottman and Lillian Meyer. That evening there was a reception at the home of the bride's parents at Port Edwards, and the happy couple left the same evening on a short wedding tour. They will be at home to their friends after the 10th instant.

### Dissolution Notice.

The partnership that has heretofore existed between J. McCarthy and Owen Love, having been dissolved by mutual consent of the interested parties, all persons are notified to call at the shop and pay accounts that may have been owing the old firm of J. McCarthy & Co. J. McCarthy Owen Love.

### Beaten by Stevens Point.

The Grand Rapids city team played its first game last Wednesday with Stevens Point, and suffered defeat by a score of seven to four. The game was fairly well attended and by doing some tall hustling the collectors cornered nearly everybody and made them pay their way to the game.

Mr. and Mrs. J. S. Thompson leave today for the south. They go to Wisconsin and from there take a boat and go down the Mississippi. Mrs. Thompson will go as far as New Orleans and then return by rail, and it should make a very pleasant trip.

### SCHOOL DAYS OVER

#### Graduating Class Holds Elaborate Doings at the Lincoln High School

The graduating class of the Lincoln high school held their commencement exercises in the assembly room of the school on Thursday and Friday evenings, and there was a large crowd in attendance both evenings.

The class play entitled "A Scrap of Paper" was given on Thursday evening, and the production elicited much favorable comment. To say that the play was handled as well as could have been done by professionals, would make a burlesque of the whole affair, but there were several, especially among the young ladies, who did very well and seemed to enter into the spirit of the thing in a very happy manner, and to entirely forget that they were at what is commonly termed the awkward age. Some of the scenes in the play were quite amusing and elicited liberal applause from the audience. Following is the cast:

Prosper Connamont.....Robert McFarland  
Baron de la Glaciere.....Charles Nash  
Bismarck.....Henry Bever  
Anatole.....Arthur Podawiltz  
Baptiste.....Horace Palmatier  
Frau Louis de la Glaciere.....Walter Kruger  
Mlle. Susanne de Roseville.....May Barnet  
Mlle. Maribella.....Georgia Ridgman  
Mlle. Zenebide.....Ruby Sawick  
Madam Dupont.....Amanda Lambert  
Pauline.....Mayme Gotschall  
On Friday evening the graduating exercises were held and on this occasion there was even a larger crowd than on the previous evening, the assembly room being filled to overflowing. The program rendered was as follows:

On the Beautiful Sea George B. Nevin  
Lincoln Glee Club  
Oration.....William Bailey Harper  
Louis H. Swain  
Oration.....Robert E. Lee  
Anthony L. Nantz  
Oration (Allegorical): An Example of Public Spirit Alexander C. Koch  
Floating 'Mid the Lilies R. W. Atkinson  
Male Quartette  
Oration The Education of the Indian Daniel H. Reichel  
Essay.....The Arthurian Legend Katherine Magdalen Bever  
Oration The Exclusion of the Chinese Robert Bruce McDonald  
New Port Bell Waltz.....Raymond Lincoln Orchestra  
Class Poem.....George R. Matthews  
Class Gifter.....James Angus Corcoran  
Class of 1906 A History and Prophecy Florence Helen Hansen  
Fred H. Eberhardt  
O, Italia, Italia, Beloved Domizetti  
Lincoln Glee Club  
Presentation of Diplomas.....  
.....Dr. F. X. Ponsenville  
.....composing the graduating class are as follows:

Maria Antoinette Smith, Florence Helen Hansen, Louis H. Swain, Ruby Esther Nutwick, Arthur A. Podawiltz, Robert Bruce McDonald, Henry Lawrence Bever, Anthony L. Nantz, Alexander C. Koch, George R. Matthews, Walter E. Kruger, Robert Ernest McFarland, Horace Palmer Palmatier, Mayme Helen Gotschall, Amanda Beatrice Lambert, Georgia May Ridgman, Fred H. Eberhardt, Charles Mott Nash, Katherine Magdalen Bever, May Kathryn Baroch, James Angus Corcoran, Daniel H. Reichel.

One of the cases that was tried before the circuit court last week was that of E. M. Miner against Frank Boyanowski. The action was one that was brought for legal services which Miner claimed was worth \$75, but which Boyanowski refused to pay. It seems that Boyanowski wrote to the secretary of the state at Madison some time ago asking for a legal opinion on some subject. Miner was assistant secretary of state and had charge of the office at the time, so he turned Boyanowski's letter over to himself, and he being a lawyer, proceeded to get up a good one for Boyanowski with a bill for \$75 for legal services, which Boyanowski refused to pay. The matter was tried in justice court, and after the matter had been heard here Judge Webb took the case out of the hands of the jury and rendered a decision for the defendant. In doing so he proceeded to rip Mr. Miner up the back to the queen's taste, and when he got thru with him it is probable that he felt about the size of a thirty cent piece. In fact the judge said some caustic things concerning the whole administration down at Madison, all of which was quite amusing to some of them in the court room, altho to others it may not have had such a humorous turn.

### On a Serious Charge.

Frank Jaunescheck of Rudolph was arrested and brought before Justice Brown on Saturday on a charge of making a carnal assault on the person of Florence Haensch, a girl nine years old. Jaunescheck waited examination and was bound over to the circuit court. The offense is punishable by imprisonment in the penitentiary for a term of not less than five or more than thirty-five years.

### NOTICE.

The Lady Macabees will meet at their hall Thursday, June 7th, at 8 o'clock p. m. Admission free to all. Next Monday and Thursday we will heal the sick at Hotel Anderson, 9 a. m. to 9 p. m.

### 'Rak For Hank's Colts.

On Sunday afternoon Hank's Colts played a game of football with the city team and during the time (during the game) the city team was out of the game by a score of 1 to 4. It looked for a time as if the city team was not going to score at all, but they braced up after a time and got in four runs.

The Colts seemed to be playing full all the time, and four of their scores were earned runs, the other three being made on errors of the city team. The Colts say they can beat the city team any time, and seem to think that with a little more practice they can shut them out entirely. Everybody admitted that the Colts are all full players and that they are entitled to more time passing attention.

Following is the lineup of the two teams:

Colts	City
Porterville	P. Springer
Fallner	H. Hotel
Star	Stratton
Hayes	Handell
Lave	Kurtz
Chesley	Weekler
Nash	Falmer
Rorhardt	N. Brown
Martenson	E. Brown

### Beaten at Stevens Point.

The Nationals, an amateur baseball team from this city, went to Stevens Point on Wednesday and played the Goggles of that city, the Stevens Point team coming out ahead by a score of 4 to 3. In speaking of the game the Stevens Point Journal says:

What was perhaps one of the most interesting games of baseball played by amateurs took place at the fair grounds Wednesday afternoon between the Grand Rapids Nationals and the Stevens Point Goggles. The Nationals, who were led by Schopp and Ben for the Goggles, showed that they were not their work, which was good ball players. Edgemoor and C. Falmer of the Nationals were also in good trim and the result of the score, which was 4 to 3 in favor of the Goggles, showed that both teams played fast ball and put forth their best efforts to gain a victory. A return game between these two teams will be played at Grand Rapids next Sunday.

By Metzger, Sweetwater, Oshkosh, Wis., June 28, 1905.

### NUGGETS OF KNOWLEDGE.

There are ladies' smoking cars of English railways.  
Alligator, a popular native dish of India, tastes like veal.  
The wood used in the best piano has been seasoned 40 years.  
Those who reach 30 in good health are likely, statistics show, to live 73.  
Over 200,000 pounds of human hair valued at \$200,000, is sold annually in Paris.  
The majority of criminals can draw and paint. That is why artists are rarely get credit.  
In many parts of the world, the government buries the dead, supplying coffins and undertaker free of cost.

Charitable Player.  
By some means a mother and daughter were managed to gain access to Paul's park's sanctum. The mother was the daughter.

### The Darkened Window.

The play given last night under the auspices of the Young Ladies Society of the Catholic church was well attended, and was pronounced to be first class in every respect. Mr. Hulger is certainly a first class man of affairs of this sort and is entitled to a great deal of praise for the manner in which the play was handled. The play will be given again this evening.

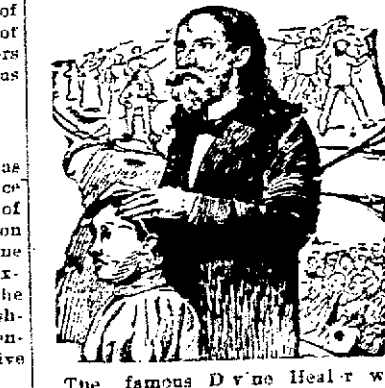

### Watson-Kellogg.

Edgar Kellogg of this city and Miss Gertrude Watson of Tacoma, Washington, were married on Saturday last at Salita, Colorado. While the young lady in the case is not known here, Edgar is the son of Mr. and Mrs. Charles F. Kellogg of this city, and has a host of friends here who will unite in wishing him a long and happy wedded life.

The Rev. S. T. Kidder, D. D., of Ripon, will preach in the Congregational church next Sunday morning and evening. Rev. Fred Staff will deliver the annual address before the Young Men's and Young Women's Christian Association of Ripon College on Sunday evening.

Bessert Bros. are engaged in laying a new cement walk in front of Dominick Reiland's meat market, Go and Schall's saloon and John Casberg's saloon, the brick walk there having outlived its usefulness. These cement walks are a great improvement over the old brick pavements, and add greatly to the appearance of the street.

### SCHLATTER!

The famous Dr. Vene Healer will preach and heal the sick free next Sunday at Grand Army hall at 3 o'clock p. m. Admission free to all. Next Monday and Thursday he will heal the sick at Hotel Anderson, 9 a. m. to 9 p. m.

### THE GLORIOUS 4TH.

#### Preparations Already in Progress For Observance of Independence Day.

Preparations have already begun for the observance of the glorious Fourth of July, and the citizens are that it will be one of the largest events of the kind that have ever taken place in this city. The observance of the Fourth of July has been a tradition in this city, and it is expected that the celebration will be a most successful one.

Major W. H. Fung, who has taken much interest in the matter, has already begun making arrangements for the celebration, and it is probable that there will be some features that have not been brought out in previous celebrations. One of the things that was proposed was a musical parade for the morning, and several of the ladies who have been seen on the subject have expressed a willingness to go in the matter, and do what they can to make a success of it, and if they keep their promise there is no question of the outcome. Whether it is the intention to incorporate an industrial parade in the morning program, or not is not yet decided. It is also proposed to go up some competitive games among the children of the city, and a number of the young men, and as many of them take more or less in athletics, it will be possible to get up some good things along this line.

In the afternoon it is also proposed to have a football game, and other things that have not been perfected as yet. There is no question but what there will be plenty of money forthcoming, as it has always been possible to get up a good purse for an occasion of this sort, even on short notice, and with the time before them the different committees will be able to do their work better than they have been able to in times gone by. More particulars will be given as the plans of the committees take form.

### Beet After the World's Championship.

Evening Wisconsin Fred Beall, the Wisconsin champion wrestler, who is after a match with Champion Frank Gotch, and who yesterday posted a forfeit for the same, says he will go still further. He will lay down the gauntlet to the world's champion, George Hackenschmidt, even with the weight greatly in favor of the Russian. Beall says he will challenge Hackenschmidt, and if a match cannot be arranged for this country, he will go to London, England, next winter and meet the champion on his own ground. Gotch has not yet replied to Beall's challenge. The Badger boy says the offer is open to Tom Jenkins, John J. Rooney or any of the heavy weights now in this country. Harvey Barker, manager of Beall, has the money ready for them at any time.

### Goldberg-Suhr.

Henry Goldberg and Miss Emma Suhr will be married this afternoon at two o'clock at the Lutheran church on the east side. They will be accompanied by Miss Rose Metzger and George Suhr. Both of the young people have a large number of friends in this city who will wish them a long and happy wedded life.

### For Member of Assembly.

Flourish announce himself as candidate at the coming primary election for the Republican nomination for member of assembly. Elected June 5, 1905.  
Thos. W. Hrozow

Those who attended the Macabees Rally at Stevens Point on Thursday, were Misses Ella Fordal, Marie Gatta, Eda Lyon and Marie Miller.

RESOLVED!  
THAT IN JUNE IS WHEN NATURE CLOTHES HERSELF IN RADIANT BEAUTY. NATURE IS GIVING US THE TIP TO DO THE SAME. HOW DO WE LOOK IN JUNE WITH OLD CLOTHES ON? AND HOW DO WE FEEL? LET US BEGIN LIKE NATURE DOES, FROM THE GROUND UP, WITH A NEW OUTFIT. GO TO THE BEST PLACE.  
BUSTER BROWN.

DEPARTMENT STORES.

[illegible]

## AMONG CRANBERRY MEN.

EDITED BY W. H. FITCH.

(All communications and special exchanges relating to this department should be sent to Cranberry, Wood County, Wis.)

### Insect Investigations.

[Wareham (Mass.) Courier.]—The following experimental work in the east will be regarded with much interest by western growers.

Mr. H. J. Franklin, who has been stationed at Wareham for the summer, by the Hatch Experiment Station, to make investigations concerning the cranberry insect troubles, is this week sending the following circular to the cranberry growers in this section whose names and addresses he has been able to obtain. It is earnestly hoped that all, whether they receive this circular or not, will take an active interest in the matter and communicate with Mr. Franklin at once. The hearty co-operation of all the growers will aid the work materially. The circular, together with a list of questions which accompanies it, is as follows:

Wareham, Mass., May 10, 1906.

Dear Sir:—I have been stationed at Wareham for the summer by the Hatch Experiment Station to make investigations concerning the cranberry insect troubles, to study the habits and life histories of the troublesome species and to make such experiments and observations as may be deemed advisable looking toward better means of combating these pests.

In this work I shall need the fullest and heartiest co-operation and assistance of all growers whom I may be able to reach. I wish to urge you to make this a personal matter and to remember that the state has taken up this work for the benefit of all.

Will you please keep careful record of the date or dates on which you have drawn or are yet to draw off the winter flowage from your bogs, also what bog or bogs are drawn off on each separate date (i. e. if you do not draw the water off from all on the same date)?

Please let me know if you intend to do any following and if you are, on what date or dates? If you do follow, will you also please keep careful record of the bog or bogs and dates on which this is done? Also please keep record of the number of hours of each followage.

I shall endeavor to visit your bog at least once or twice during the summer. I may not be able to do so, however. I shall, at all events, call for any records which you may keep as suggested, at the end of the season, or possibly before that time. A carefully dated bi-weekly record concerning the appearance and condition of your bog or bogs as regards insect attack, with special reference to your time of following or to your use of insecticides would also be of great value to me.

If you have any serious insect trouble during the summer, I shall be glad to know of it at once, also what insect you suppose to be the one troubling you. Please let me know, by letter, if you use any insecticides this summer, and if you do, what they are, against what insect used, at what time applied, by what method and in what strength applied and with what apparent results.

I send you a list of questions, to which I hope to receive, from each grower, careful and considered answers. You may write in your answers in the blank spaces which I have left between my questions, on the printed sheet, and return the same to me.

As the field is large and my time limited, it is important that I receive an immediate reply to this letter from each grower, that I may know of your willingness to co-operate with me along the lines I have suggested. Very sincerely yours,

H. J. Franklin,

In charge of Cranberry Insect Investigations.

QUESTIONS.

1 What area have you under cranberry cultivation?

2 How much of this is strictly dry bog (i. e. how much cannot be flowed at all either in summer or winter)?

3 How much can be covered with water during the winter but cannot be reflooded during the summer?

4 How much can be reflooded at any time during the summer in an ordinary season?

5 Are you seriously troubled with insects?

6 If so, what are they?

7 What per cent do you estimate as your yearly loss from insect attack?

8 What has been the average amount per acre which you have spent each year in checking or attempting to check insect pests?

9 What amount per acre do you feel that you could afford to expend annually in fighting insects provided that the methods used proved satisfactory?

10 Have you ever used a contact poison (such as kerosene emulsion or whale oil soap) to destroy insect pests (particularly the eggs of the fire worm in the late fall or early spring)?

11 If so, with what results?

12 Do you believe that late holding of water in the spring injures the vines in any way?

13 If so, what is the latest date, in an average year, to which you think you can hold the water without any injury?

14 What do you think is the most desirable time in the spring to draw off the water, whether you have water for the second flow or not?

15 Have you any bogs on which early varieties only are planted?

16 At what date, and how much earlier than you harvest the late varieties, do you harvest these early ones?

17 Is it your practice to flow the bogs bearing the early varieties immediately after harvesting or do you wait until you have harvested the late varieties and then flow all at once?

18 Have you ever used arsenate of lead against the fire worm?

19 If so, with what results?

20 Have you ever used arsenate of lead against the fruit worm?

21 If so, with what results?

22 Have you used arsenate of lead against the army worm?

23 If so, with what results?

24 What insecticides have you used besides those already mentioned and against what insects?

25 At what time of the year did you apply them?

26 Do you think that following has any effect on the keeping qualities of the fruit? If so, what proof of it have you?

27 With what results as regards the insects?

28 Do you think that following has any effect on the keeping qualities of the fruit? If so, what proof of it have you?

29 With what results as regards the insects?

30 Do you think that following has any effect on the keeping qualities of the fruit? If so, what proof of it have you?

31 With what results as regards the insects?

32 Do you think that following has any effect on the keeping qualities of the fruit? If so, what proof of it have you?

33 With what results as regards the insects?

34 Do you think that following has any effect on the keeping qualities of the fruit? If so, what proof of it have you?

35 With what results as regards the insects?

36 Do you think that following has any effect on the keeping qualities of the fruit? If so, what proof of it have you?

37 With what results as regards the insects?

38 Do you think that following has any effect on the keeping qualities of the fruit? If so, what proof of it have you?

39 With what results as regards the insects?

40 Do you think that following has any effect on the keeping qualities of the fruit? If so, what proof of it have you?

75 With what results as regards the insects?

76 Do you think that following has any effect on the keeping qualities of the fruit? If so, what proof of it have you?

77 With what results as regards the insects?

78 Do you think that following has any effect on the keeping qualities of the fruit? If so, what proof of it have you?

79 With what results as regards the insects?

80 Do you think that following has any effect on the keeping qualities of the fruit? If so, what proof of it have you?

81 With what results as regards the insects?

82 Do you think that following has any effect on the keeping qualities of the fruit? If so, what proof of it have you?

83 With what results as regards the insects?

84 Do you think that following has any effect on the keeping qualities of the fruit? If so, what proof of it have you?

85 With what results as regards the insects?

86 Do you think that following has any effect on the keeping qualities of the fruit? If so, what proof of it have you?

87 With what results as regards the insects?

88 Do you think that following has any effect on the keeping qualities of the fruit? If so, what proof of it have you?

89 With what results as regards the insects?

90 Do you think that following has any effect on the keeping qualities of the fruit? If so, what proof of it have you?

91 With what results as regards the insects?

92 Do you think that following has any effect on the keeping qualities of the fruit? If so, what proof of it have you?

93 With what results as regards the insects?

94 Do you think that following has any effect on the keeping qualities of the fruit? If so, what proof of it have you?

95 With what results as regards the insects?

96 Do you think that following has any effect on the keeping qualities of the fruit? If so, what proof of it have you?

97 With what results as regards the insects?

98 Do you think that following has any effect on the keeping qualities of the fruit? If so, what proof of it have you?

99 With what results as regards the insects?

100 Do you think that following has any effect on the keeping qualities of the fruit? If so, what proof of it have you?

101 With what results as regards the insects?

102 Do you think that following has any effect on the keeping qualities of the fruit? If so, what proof of it have you?

103 With what results as regards the insects?

104 Do you think that following has any effect on the keeping qualities of the fruit? If so, what proof of it have you?

105 With what results as regards the insects?

106 Do you think that following has any effect on the keeping qualities of the fruit? If so, what proof of it have you?

107 With what results as regards the insects?

108 Do you think that following has any effect on the keeping qualities of the fruit? If so, what proof of it have you?

109 With what results as regards the insects?

110 Do you think that following has any effect on the keeping qualities of the fruit? If so, what proof of it have you?

111 With what results as regards the insects?

112 Do you think that following has any effect on the keeping qualities of the fruit? If so, what proof of it have you?

113 With what results as regards the insects?

114 Do you think that following has any effect on the keeping qualities of the fruit? If so, what proof of it have you?

115 With what results as regards the insects?

116 Do you think that following has any effect on the keeping qualities of the fruit? If so, what proof of it have you?

117 With what results as regards the insects?

118 Do you think that following has any effect on the keeping qualities of the fruit? If so, what proof of it have you?

119 With what results as regards the insects?

120 Do you think that following has any effect on the keeping qualities of the fruit? If so, what proof of it have you?

121 With what results as regards the insects?

122 Do you think that following has any effect on the keeping qualities of the fruit? If so, what proof of it have you?

123 With what results as regards the insects?

124 Do you think that following has any effect on the keeping qualities of the fruit? If so, what proof of it have you?

125 With what results as regards the insects?

126 Do you think that following has any effect on the keeping qualities of the fruit? If so, what proof of it have you?

127 With what results as regards the insects?

128 Do you think that following has any effect on the keeping qualities of the fruit? If so, what proof of it have you?

129 With what results as regards the insects?

130 Do you think that following has any effect on the keeping qualities of the fruit? If so, what proof of it have you?

131 With what results as regards the insects?

132 Do you think that following has any effect on the keeping qualities of the fruit? If so, what proof of it have you?

133 With what results as regards the insects?

134 Do you think that following has any effect on the keeping qualities of the fruit? If so, what proof of it have you?

135 With what results as regards the insects?

136 Do you think that following has any effect on the keeping qualities of the fruit? If so, what proof of it have you?

137 With what results as regards the insects?

138 Do you think that following has any effect on the keeping qualities of the fruit? If so, what proof of it have you?

139 With what results as regards the insects?

140 Do you think that following has any effect on the keeping qualities of the fruit? If so, what proof of it have you?

141 With what results as regards the insects?

142 Do you think that following has any effect on the keeping qualities of the fruit? If so, what proof of it have you?

143 With what results as regards the insects?

144 Do you think that following has any effect on the keeping qualities of the fruit? If so, what proof of it have you?

145 With what results as regards the insects?

146 Do you think that following has any effect on the keeping qualities of the fruit? If so, what proof of it have you?

147 With what results as regards the insects?

148 Do you think that following has any effect on the keeping qualities of the fruit? If so, what proof of it have you?

149 With what results as regards the insects?

150 Do you think that following has any effect on the keeping qualities of the fruit? If so, what proof of it have you?

151 With what results as regards the insects?

152 Do you think that following has any effect on the keeping qualities of the fruit? If so, what proof of it have you?

153 With what results as regards the insects?

154 Do you think that following has any effect on the keeping qualities of the fruit? If so, what proof of it have you?

155 With what results as regards the insects?

156 Do you think that following has any effect on the keeping qualities of the fruit? If so, what proof of it have you?

157 With what results as regards the insects?

158 Do you think that following has any effect on the keeping qualities of the fruit? If so, what proof of it have you?

159 With what results as regards the insects?

160 Do you think that following has any effect on the keeping qualities of the fruit? If so, what proof of it have you?

161 With what results as regards the insects?

162 Do you think that following has any effect on the keeping qualities of the fruit? If so, what proof of it have you?

163 With what results as regards the insects?

164 Do you think that following has any effect on the keeping qualities of the fruit? If so, what proof of it have you?

165 With what results as regards the insects?

166 Do you think that following has any effect on the keeping qualities of the fruit? If so, what proof of it have you?

167 With what results as regards the insects?

168 Do you think that following has any effect on the keeping qualities of the fruit? If so, what proof of it have you?

169 With what results as regards the insects?

170 Do you think that following has any effect on the keeping qualities of the fruit? If so, what proof of it have you?

171 With what results as regards the insects?

172 Do you think that following has any effect on the keeping qualities of the fruit? If so, what proof of it have you?

173 With what results as regards the insects?

174 Do you think that following has any effect on the keeping qualities of the fruit? If so, what proof of it have you?

175 With what results as regards the insects?

176 Do you think that following has any effect on the keeping qualities of the fruit? If so, what proof of it have you?

177 With what results as regards the insects?

178 Do you think that following has any effect on the keeping qualities of the fruit? If so, what proof of it have you?

179 With what results as regards the insects?

180 Do you think that following has any effect on the keeping qualities of the fruit? If so, what proof of it have you?

181 With what results as regards the insects?

182 Do you think that following has any effect on the keeping qualities of the fruit? If so, what proof of it have you?

183 With what results as regards the insects?

184 Do you think that following has any effect on the keeping qualities of the fruit? If so, what proof of it have you?

185 With what results as regards the insects?

186 Do you think that following has any effect on the keeping qualities of the fruit? If so, what proof of it have you?

187 With what results as regards the insects?

188 Do you think that following has any effect on the keeping qualities of the fruit? If so, what proof of it have you?

189 With what results as regards the insects?

190 Do you think that following has any effect on the keeping qualities of the fruit? If so, what proof of it have you?

191 With what results as regards the insects?

192 Do you think that following has any effect on the keeping qualities of the fruit? If so, what proof of it have you?

193 With what results as regards the insects?

194 Do you think that following has any effect on the keeping qualities of the fruit? If so, what proof of it have you?

195 With what results as regards the insects?

196 Do you think that following has any effect on the keeping qualities of the fruit?
